

Novasub P&T-CL surface control unit for controlling 1 to 4 P&T-C-01 systems with camera and light.

The Novasub P&T-CL control is based on the latest electronic technology and is specially designed for an outstanding video and light quality. The camera (any composite camera) is interfaced to the built in controls and can be fully controlled from any standard CCTV PTZ controller with the Pelco-D protocol.

Features

- LED-light control
- Video amplifier for twisted pair and coax
- Operates on standard CCTV PTZ controllers

Options

- 1 to 4 P&T-CL control channels

The system can control 1 to 4 pan & tilt units with video and light control channels. The rear side of the SCU can be connected to a recorder or a monitor. The unit has video amplifier for video transmission over twisted pair or coax, automatic cable length and type adjustments up to 600 m of cable. The light is dimmable from 0-100%.

PTZ controller

Specifications

Controls	: Main power ON/OFF, Camera ON/FF, Light ON/OFF with dimming
Power supply	: 100-240 vac, 65 watt
Connections	: 1x Multipin, 2x BNC video out, 1x Fuse per P&T unit
Light control	: ON/OFF and 0-100% Dimmable per P&T unit
Video transmission	: Video amplifier for video transmission over twisted pair or Coax, automatic cable length and type adjustments up to 600 m of cable.
Dimensions	: 19" 2U high – 265 mm deep (excluding connectors)
